

Indian Navy

Summary

The Indian Navy is the 7th most powerful navy of the world. It has over 300,000 tons of seafaring vessels. The role of the Indian Navy is very vast, ranging from providing assistance at times of natural disasters to fighting in the war in order to safeguard the country and destroy the enemies. Broadly the role of Indian navy is categorized into four categories: The Military role, the Diplomatic role, Constabulary role, and the Benign Role. They are responsible for deterrence against war as well as foreign interventions, maintaining the country's territorial integrity, safeguarding the shores, surveillance.
