विषय-संस्कृत

- परिवार पर आधारित एक 'संस्कृत पत्रिका' बनाइए, जिसमें आपके परिवार के सभी सदस्यों का परिचय संस्कृत में दीजिए

निर्देश:

पत्रिका का नाम संस्कृत में रखें, जैसे "मम परिवारः" या "कुटुम्बकथा"।

हर सदस्य के साथ उनका चित्र (फोटो या चित्रित) लगाएँ।

प्रत्येक सदस्य के लिए 1 या 2 संस्कृत वाक्य लिखें।

उदाहरण: "एषा मम भगिनी अस्ति। सा छात्रा अस्ति। सा नृत्यं कुर्वति।"

पत्रिका को रंगीन और सजावटी बनाएँ।

कम से कम 10 संस्कृत वाक्य लिखे।

चित्र, सजावट और रचनात्मकता का उपयोग करें।

नोट-(अपनी परिवार पत्रिका को A4 साइज शीट पर आकर्षक और रचनात्मक तरीके से प्रस्तुत करें।)

MATHEMATICS

INSTRUCTIONS:-

- 1) Do the given holiday homework on the coloured A4 size sheets. Each sheet should have a neat border and must be decorated with Delhi and Sikkim related designs.**

A) SUBJECT ENRICHMENT ACTIVITY

ACTIVITY 1

OBJECTIVE

To verify that when two lines intersect, vertically opposite angles are equal

MATERIAL REQUIRED

Drawing sheet, thumb pins, colour pencil, tracing paper, adhesive, cardboard.

METHOD OF CONSTRUCTION

1. Take a cardboard of convenient size and paste a white sheet on it.
2. Draw a pair of intersecting lines AB and CD as shown in Fig. 1.

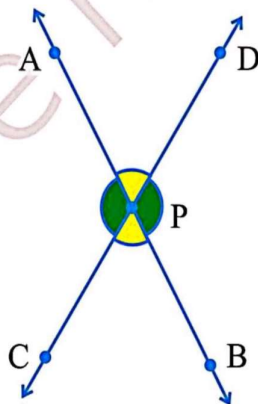

Fig. 1

3. Mark the point of intersection P of these lines.
4. Colour $\angle BPC$ and $\angle APD$ with the same colour, say yellow.
5. Colour $\angle BPD$ and $\angle APC$ with the same colour, say green.

- Trace Fig.1 on a tracing paper and colour the angles of the figure in the same way as done in Steps 4 and 5.
- Fix the trace copy on Fig.1 using a thumb pin at the point P, so that the tracing copy can be freely rotated.

DEMONSTRATION

- $\angle APD$ and $\angle BPC$ are vertically opposite angles, in Fig.1.
- $\angle APC$ and $\angle DPB$ are vertically opposite angles, Fig.1.
- Rotate the trace copy about the point P through an angle of 180° .
- $\angle BPC$ covers $\angle APD$ exactly.

So, $\angle BPC = \angle APD$.

- $\angle APC$ covers $\angle BPD$ exactly. So, $\angle APC = \angle BPD$.

Thus, vertically opposite angles are equal.

OBSERVATION

On actual measurement

$\angle APC = \underline{\hspace{2cm}}$, $\angle BPD = \underline{\hspace{2cm}}$.

$\angle BPC = \underline{\hspace{2cm}}$, $\angle APD = \underline{\hspace{2cm}}$.

$\angle APC = \angle \underline{\hspace{2cm}}$.

$\angle \underline{\hspace{2cm}} = \angle APD$.

So, vertically opposite angles are $\underline{\hspace{2cm}}$.

APPLICATION

This activity can be used to explain the meaning of vertically opposite angles. The result is useful in solving many geometrical problems.

ACTIVITY 2

Write the question before pasting the double bar graph and answer the parts after pasting the double bar graph.

A) Consider this data collected from a survey of a colony.

Favourite Sport	Cricket	Basket Ball	Swimming	Hockey	Athletics
Watching	1240	470	510	430	250
Participating	620	320	320	250	105

- i) Draw a double bar graph choosing an appropriate scale.
- ii) What do you infer from the bar graph?
- iii) Which sport is most popular?
- iv) Which is more preferred, watching or participating in sports?

B) Learn multiplication tables from 1 to 20.

C) Revise and practice all the chapters covered in the class.
